

## REPORT (04/10/2023)

### Read carefully before use app.

Note: Program uses account Sogo to send email, so you need account Sogo to input in to email and password.

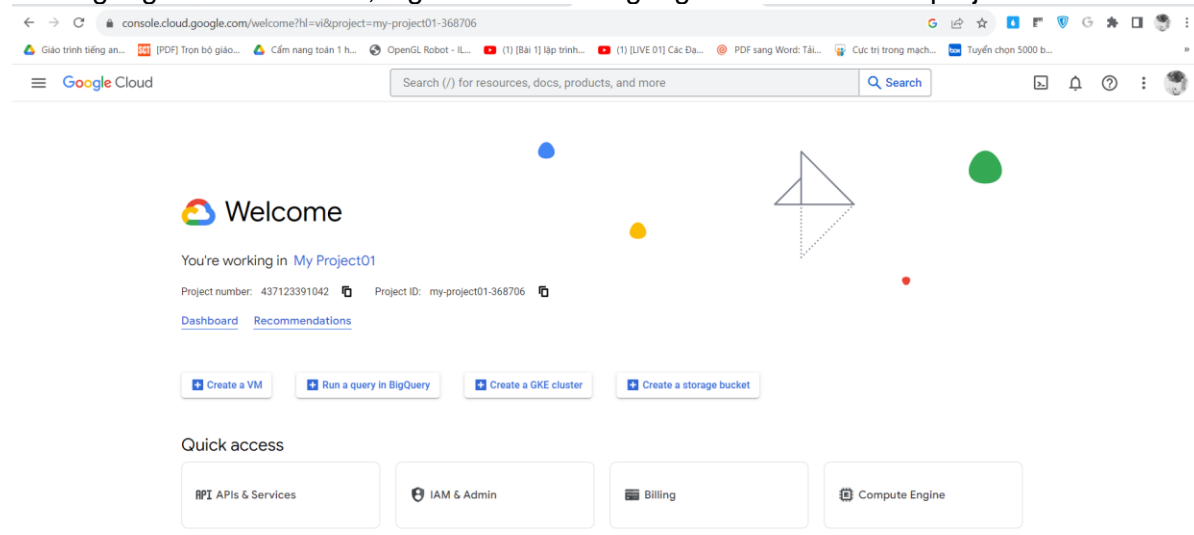

### 1. How to get credential file:

Credentials, for detail, can see post via link :"

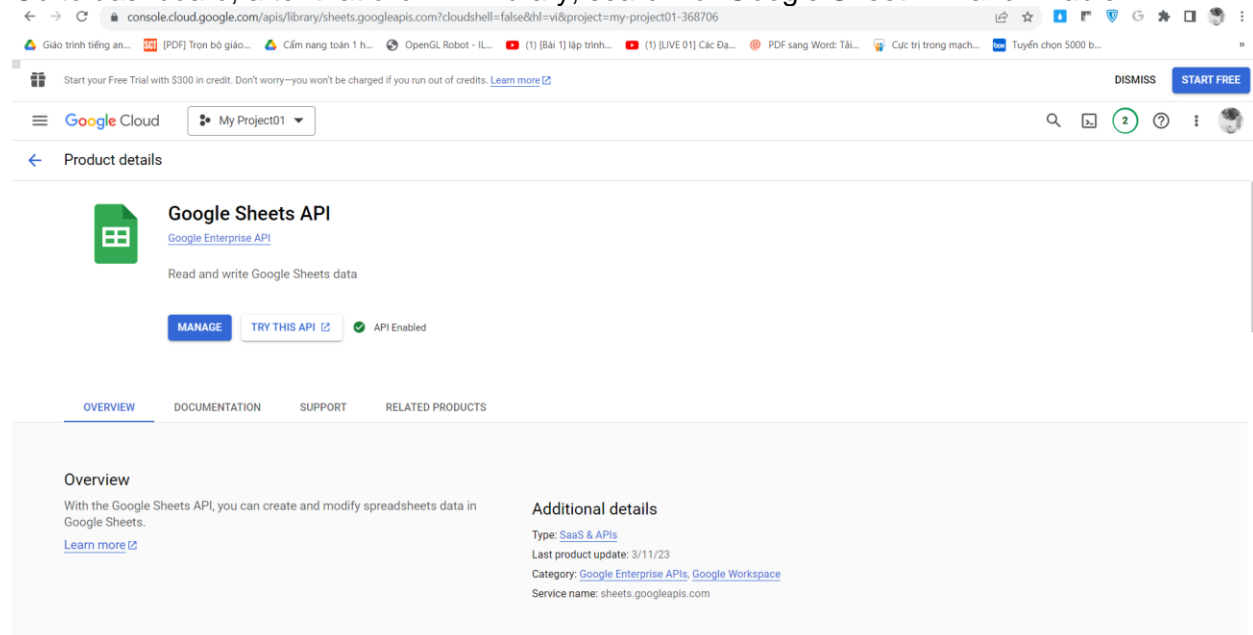

<https://developers.google.com/workspace/guides/create-credentials>"

Detail:

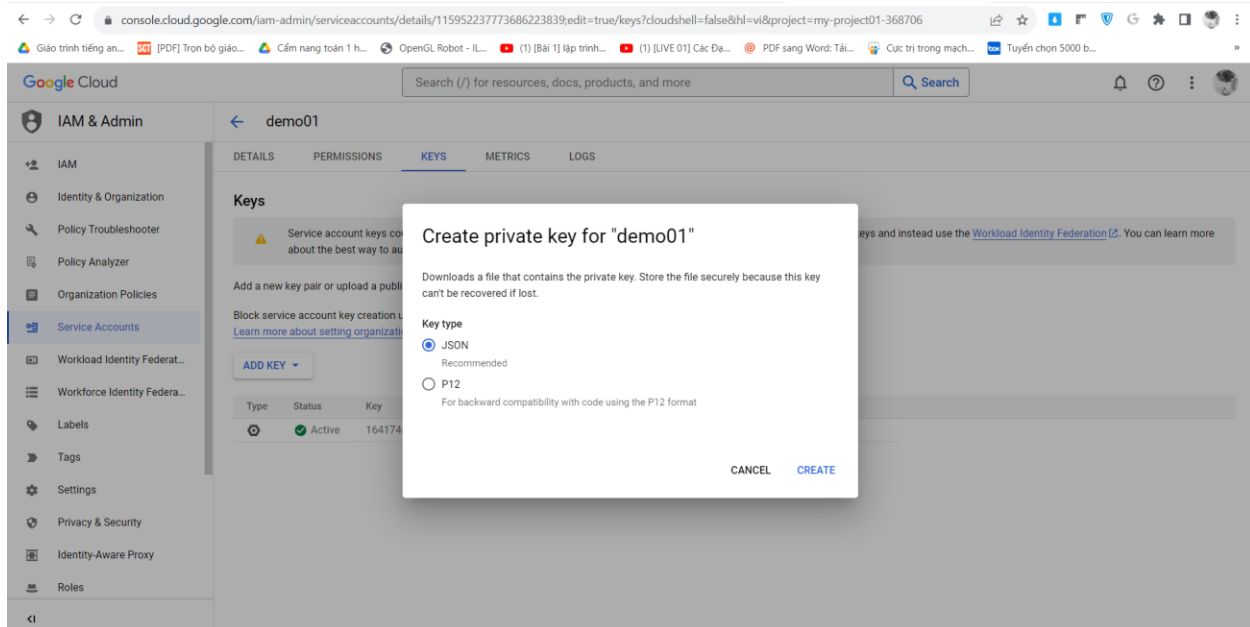

Go to google cloud console, login with account google and create new project in here.

Go to dashboard, after that click API library, search for Google Sheet API and Enable.

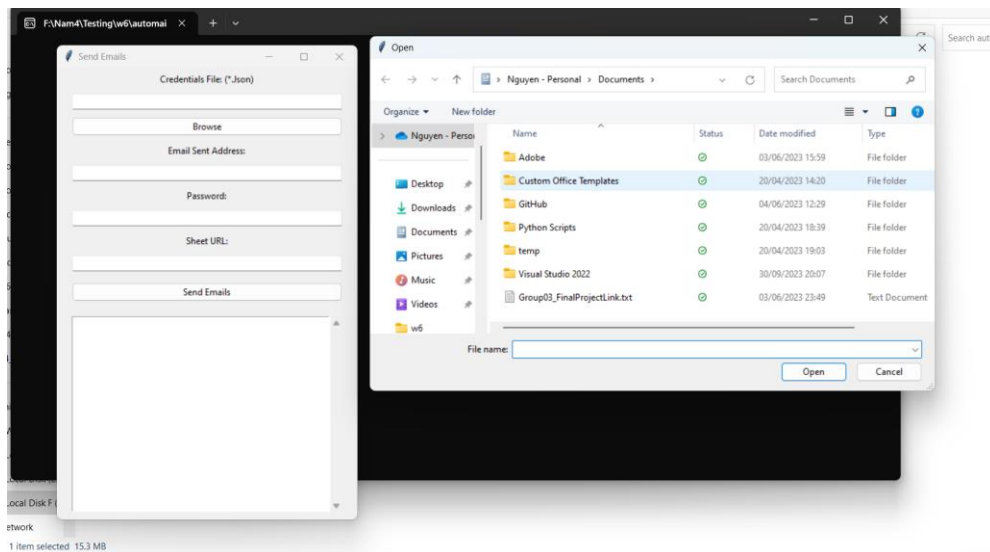

Return to dashboard, choose Credentials , create new service account and click it .  
Select Tab Key -> Add key -> New Key-> JSON -> create .

After that download this file.

## 2. How to run file

step 1: Click “Brower” to choose file credentials.

Step 2: input all value email addresses, password, sheet URL and click “Send Email” button.

Send Emails

Credentials File: (\*.Json)

F:/intern/04\_10\_23/my-project01-368706-164174a1cddd.json

Browse

Email Sent Address:

ray.huynh@qt-globalgroup.com

Password:

\*\*\*\*\*

Sheet URL:
